

CERTIFIED STRUCTURAL CONTRACTORS

RCC WORKS & CIVIL
CONSTRUCTION CONTRACTOR

WORK OPPORTUNITIES & TENDERS INVITED

We undertake high-precision RCC structural frameworks and turnkey civil construction works for residential high-rises, commercial developments, and infrastructure projects with certified site supervisors, advanced shuttering systems, and specialized execution teams.

Stronger Structures,
Brighter Future

ENGINEERED FOR GENERATIONS

OUR SPECIALIZED SERVICES

Footing & Raft Foundation

Deep excavation, isolated/raft footings & pile cap casting.

Column, Beam & Slab RCC

Monolithic framing with M25-M60 concrete grade compliance.

Reinforcement / Steel Binding

Precision BBS cutting, high-tensile Fe550D rebar & automated tying.

Shuttering & Formwork

Heavy-duty plywood, steel plates & cuplock staging systems.

Mivan / Aluminium Formwork

Fast-track monolithic aluminium shuttering cycles for high-rise.

Concrete Pouring & Placement

Transit mixer pumping, boom placers & mechanical needle compaction.

Staircase RCC Work

Doglegged, cantilevered & spiral staircase precision shuttering.

Shear Wall & Core Works

High-stress seismic shear walls, lift shafts & structural cores.

AAC Blockwork & Masonry

High-grade AAC block masonry, fly ash bricks & polymer joint mortars.

Internal & External Plaster

2-coat sand-faced plaster, gypsum punning & continuous curing.

Civil Finishing Works

Terrace waterproofing, sunken slab treatment & structural screeding.

Technical Labour Supply

Certified bar benders, shuttering carpenters, masons & supervisors.

CONTRACT WORK OPTIONS

Labour Contract

Skilled manpower for rebar, shuttering, and concrete casting activities.

Item Rate Contract

Execution as per mutually agreed BOQ and scheduled unit rates.

RCC Package Contract

Complete shuttering, rebar fabrication, and concreting manpower package.

Civil Work Package

RCC structure + AAC blockwork + internal/external plaster + allied civil.

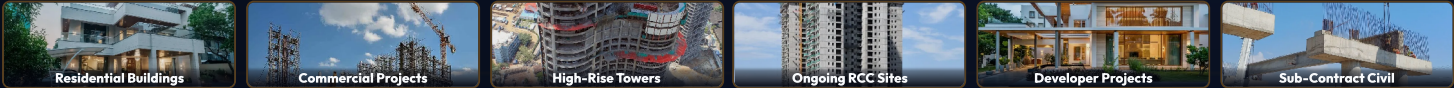

AVAILABLE FOR CONTRACTS

RCC / Civil Construction Work Opportunities

We are actively available for new projects, ongoing construction sites, and developer sub-contracts requiring reliable RCC contractors, modern formwork, and skilled manpower teams.

Rapid 72-Hour Site Mobilization Across Uttar Pradesh & Pan-India

PROJECT TYPES & EXPERTISE

- Quality-Oriented Execution
- Timely Completion
- Experienced Site Team
- Proper Site Coordination
- Cost-Effective Solutions
- Client Satisfaction

IS CODE COMPLIANCE & ENGINEERING PROTOCOLS

IS 456:2000 Compliance:

Structural concrete design, water-cement ratios, and durability guidelines strictly verified.

IS 1786:2008 Rebar Standards:

High-yield Fe500D / Fe550D primary reinforcement with certified bend & rebend test reports.

IS 13920:2016 Seismic Ductility:

Specialized seismic detailing for shear walls, beam-column junctions, and confining links.

Steel Wastage Optimization:

Precision digital Bar Bending Schedules (BBS) guaranteeing rebar scrap control under 3%.

Machine-Made Cover Blocks:

100% factory-moulded concrete cover blocks (25mm to 50mm) strictly maintained across all elements.

PLANT, MACHINERY & STAGING FLEET

Formwork & Staging

50,000+ sq. ft. heavy-duty cuplock staging, adjustable steel props, H-Beams & Mivan aluminium shuttering panels.

Concrete Pumping

Stationary & mobile high-pressure concrete pumps, boom placers, and transit mixer logistics coordination.

Rebar Processing

Heavy-duty electric bar cutting & motorized bending machines with precision angle stops for high-speed BBS execution.

Testing Apparatus

Calibrated slump cones, concrete cube moulds, digital cover meters, and optical auto-levels for line-level accuracy.

APPROVED MATERIALS & BRAND SPECIFICATIONS

Structural Cement

Grade 53 OPC / PPC from approved Tier-1 manufacturers (Ultratech, Ambuja, ACC) with batch test certificates.

Reinforcement Steel

Primary TMT Fe500D / Fe550D rebar (Tata Tiscon, SAIL, JSW) conforming to high ductility seismic standards.

Formwork & Staging

BWP grade film-faced 12mm/18mm plywood, heavy-duty cuplock verticals/edgers, and engineered aluminium forms.

Concrete Admixtures

High-range polycarboxylate superplasticizers and waterproofing compounds (Fosroc, Sika, BASF) for mix optimization.

5-STAGE RIGOROUS ON-SITE QUALITY AUDIT CYCLE

1

Line & Level

Total station & optical leveling of shuttering base, plumb checks & tight joints.

2

Rebar & BBS

Verification of rebar spacing, lap lengths, chair bars & cover block placement.

3

Pre-Pour Audit

Slump cone test, air-clearing of formwork, MEP sleeve coordination & sign-off.

4

Compaction

Systematic mechanical needle vibration (40mm/60mm) preventing honeycombing.

5

Curing & Tests

Mandatory 14–28 day ponding/hessian curing; 7 & 28 day cube compressive tests.

ZERO-ACCIDENT SITE POLICY

Comprehensive Health, Safety & Environment (HSE) Protocols

We consider worker safety paramount. Every jobsite operates under active safety engineers, daily toolbox talks (TBT), and mandatory PPE enforcement.

100% PPE: Helmets, Boots & Harnesses

Daily Pre-Shift Safety Briefings (TBT)

Perimeter Catch Nets & Edge Guard Rails

Statutory BOCW & Labour Welfare Compliance

HOW TO INVITE TENDERS & AWARD CONTRACTS

1. Share BOQ & Drawings

Email structural drawings & tender BOQ to info@hvconstruction.com

2. Site Feasibility Audit

Our engineering team conducts rapid site inspection & logistical planning.

3. Competitive Quotation

Transparent item-rate or package proposal with detailed timeline schedule.

4. Rapid Mobilization

On-site mobilization of staging equipment & skilled workforce within 72 hours.

FAST-TRACK 48-HOUR RESPONSE
